

## Rockyfor3D – a leading rockfall simulator

At Nature Analytics, we specialize in cutting-edge natural hazard modeling and risk analysis, supporting professionals in making informed, data-driven decisions to save lives and protect critical infrastructure.

Rockyfor3D is powered by Nature Analytics. It provides a proven 3D simulation solution that models rockfall trajectories in complex terrain, including the effects of nets, dams and forests. Rockyfor3D is used in over 50 countries for hazard and risk assessment, protection forest evaluation, and the design of mitigation measures. Rockyfor3D delivers reliable results for both regional studies and site-specific projects. It is user-friendly, brings scientific rigor, and can be applied in any setting.

弊社「Nature Analytics」は、ネット、ダム、森林の影響を含め、複雑な地形における落石の軌道をモデル化する、世界中で利用されている3Dシミュレーションソフトウェア「Rockyfor3D」を開発・提供しています。

Nature Analytics is proud to support Interpraevent2026 in Sapporo and contribute to advancing natural hazard management and risk reduction.
